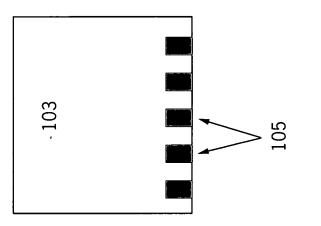

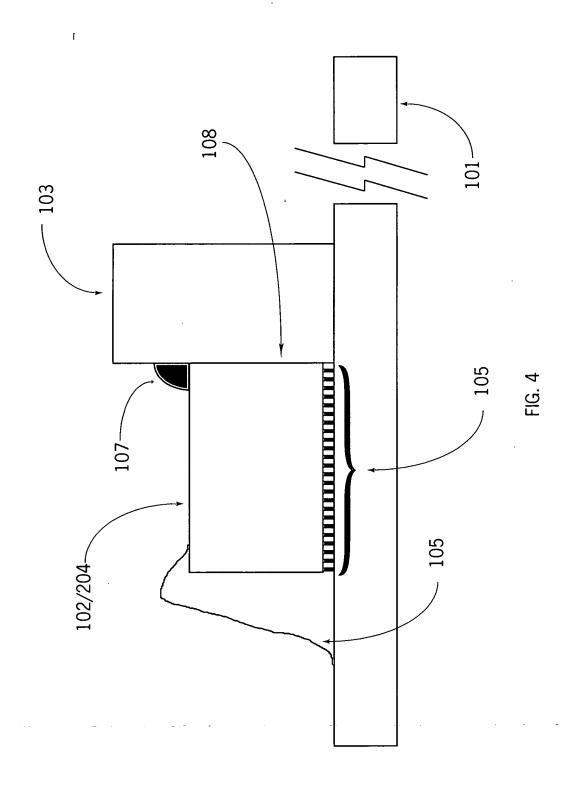

FIG. 3 (II)

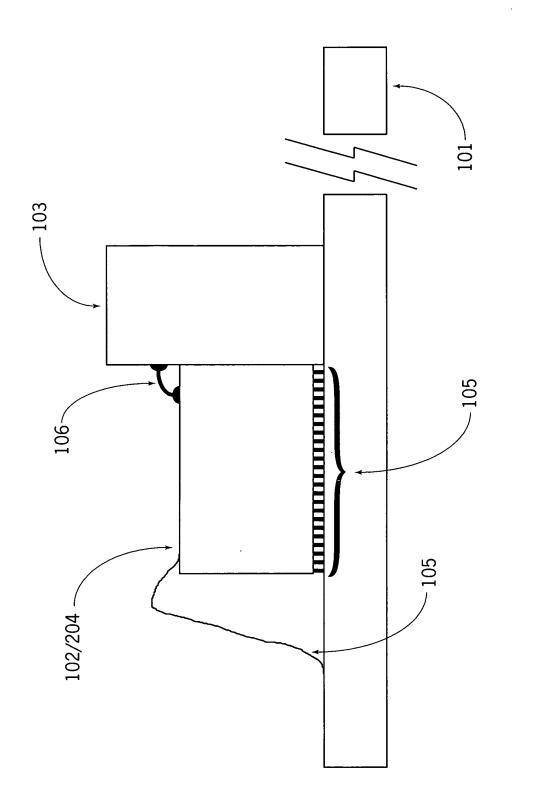

FIG. 5

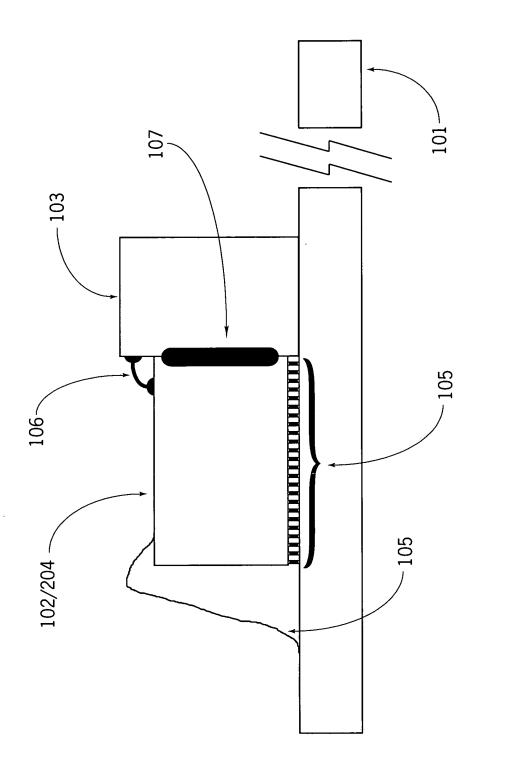

FIG. 6

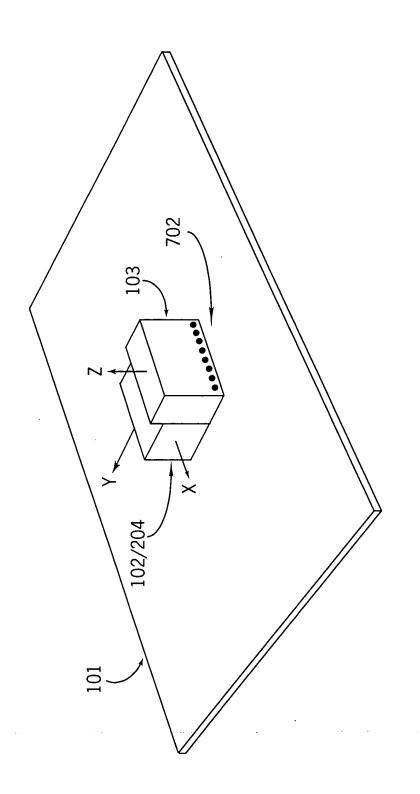

FIG. 7

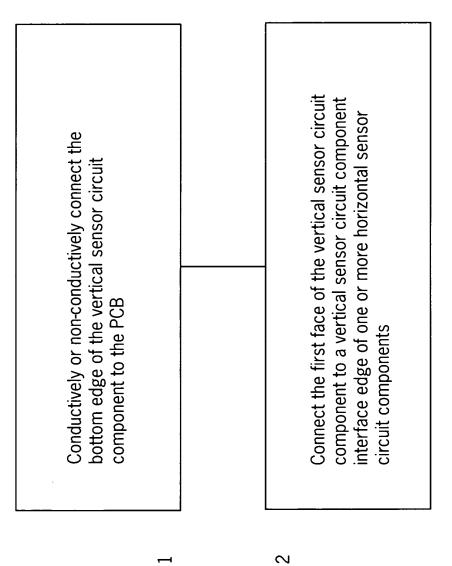

FIG. 8

magnetic sensor circuit component interface edge, and two or more other edges to a PCB

Mount one or more magnetic field sensing circuit components

comprising a top face, a PCB mounting face, a vertical

Mount a magnetic sensor circuit component comprising a first and second face, a bottom, top, and two side edges, I/O pads and a sensitive direction to the PCB wherein the I/O pads are arranged on the second face proximal to the bottom edge of the sensor circuit component and the sensitive direction can be perpendicular to the I/O pads arranged proximal to the bottom edge.
